PROFILE

I am an adept Full Stack Web Developer skilled in both front-end and back-end technologies. I create responsive, visually appealing web applications, specializing in database integration and RESTful APIs. My dedication to clean code and staying updated with the latest trends empowers me to deliver outstanding, user-centric solutions.

PROJECTS

Krishna Flutes

HTML, CSS, JavaScript

- A landing page cum one page full website for a flute shop
- A dynamic website with six selectable stylesheets for users to customize their experience
- Implemented web storage to retain user-selected stylesheets across page refreshes for a personalized browsing experience

JS Documentation

HTML, CSS, JavaScript

- Developed "JS Documentation," a comprehensive web resource for JavaScript beginners and enthusiasts.
- Designed a user-friendly interface for quick navigation and easy access to JavaScript concepts.
- Incorporated responsive design and a mobile-friendly menu for a seamless learning experience on various devices.

Cash Register

JavaScript

- A cash register for businessmen
 - Helps to know, is change available or not? And if available than gives the exact amount of change in available currency notes and coins
-
